

Naman Jain

Product Analyst | Business Analyst | Product Operations

+91 9006800202 | [E-Mail](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Product Analyst with experience designing and scaling internal business applications across collections, inventory, and service operations. Contributed to 0→1 product development initiatives supporting 20+ operational centers by translating business requirements into workflows, user stories, and scalable product solutions. Experienced in stakeholder management, process optimization, analytics, and KPI-driven decision making.

EDUCATION

United Institute of Technology, Prayagraj

Bachelor of Technology, Electronics and Communication Engineering

CGPA: 6.98/10

Nov 2022 - Present

EXPERIENCE

Product Analyst – HeyEV!

Sept 2025 - Present

- Collaborated in the 0→1 design and development of Loan Management, Inventory Management and Service Management platforms supporting **20+ centers, 100–200 active users** and **5,000+ monthly collection transactions**.
- Conducted stakeholder discovery sessions and translated business requirements into user stories, workflows and feature specifications for collections, inventory, and service operations, collaborating with engineering teams during prioritization, validation, and rollout.
- Co-designed the Loan Management System (LMS) and independently led workflow design for Inventory and Service Management platforms, introducing standardized processes, validation logic, and reporting mechanisms to improve operational efficiency and data accuracy.
- Replaced **20+ operational Google Sheets** with centralized web-based systems featuring role-based access controls, workflow validations and structured reporting, improving governance, transparency, and scalability.
- Developed VBA-powered inventory automation tools that reduced inventory processing effort from **over 2 working days to under 2 hours** while supporting management of **100+ assets monthly**.
- Designed service workflows handling **400+ monthly service tickets** with ownership tracking, reassignment logic, and **12+ configurable status transitions**, while defining reporting solutions including **Sales, Referral and Customer360** dashboards

Technical Intern – Converged Core, Reliance Jio Infocomm Ltd.

Jun 2025 – Jul 2025

- Analyzed EPC, 5GC and VoLTE architectures to understand large-scale telecom core network operations, traffic routing, and communication workflows.
- Evaluated data center operations and network security mechanisms including DDoS mitigation, firewalls and authentication systems supporting enterprise infrastructure.

Data/Business Analyst Intern, DeepThought Edutech Ventures

Jul 2024 – Nov 2024

- Developed Power BI dashboards and analytical reports supporting operational decision-making and cost optimization initiatives that contributed to an estimated 50% reduction in operational costs.
- Designed centralized databases and automated data collection workflows using SQL and Selenium, improving data integrity, reporting efficiency, and business visibility through analytics-driven process improvements.

SELECTED PROJECTS

Smart Pollution Monitoring & Automated E-Challan Platform | ESP32, React, Node.js, MongoDB

- Built a full-stack IoT platform integrating ESP32, GPS, GSM, React and MongoDB for real-time vehicle emission monitoring, automated alerts, and e-challan generation.

Adaptive Traffic Management System | IoT, Embedded Systems

- Developed an adaptive traffic management system using IR and RFID sensors, improving simulated traffic flow efficiency by 67%.

SKILLS

- **Product Management:** Requirement Gathering, User Stories, Workflow Design, Wireframing, Stakeholder Management, Backlog Prioritization, Agile, Product Discovery
- **Analytics & Reporting:** SQL, Power BI, Advanced Excel, Dashboard Design, KPI Analysis
- **Tools:** Figma, Jira, Python, Java, MySQL, PostgreSQL
